

APPENDIX B: City of Roseville LHMP Status

The City of Roseville developed and adopted an approved single jurisdictional LHMP specific to their city in 2005. As such, Roseville is not considered a participating jurisdiction for this update to the Placer County LHMP. As part of this Placer County LHMP update process, a review of Roseville's LHMP status was conducted and summarized in this Appendix B as detailed below.

The Steering Committee for the City of Roseville Hazard Mitigation Plan has conducted annual reviews in the intervening years since their plan's original approval and adoption and has made significant progress in the implementation of action items. Listed below are implementation successes reported in annual plan review reports from 2006-2008.

2008 Annual Multi-Hazard Mitigation Plan Review

- **Native Oak Tree Planting Project:** 6,250 trees were planted at seven sites during the winter and spring of 2007-2008
- **FY07 Flood Mitigation Assistance Grant:** On July 2, 2008 a grant in the amount of \$227,996 was awarded to purchase a severe repetitive loss structure at 1211 Champion Oaks Drive.
- **National Building Department Accreditation:** Roseville was the first municipality in California to earn national accreditation by the International Accreditation Service (IAS).
- **Relocation of Emergency Operations Center:** The City's Emergency Operations Center was relocated to the Riley Library building at 1501 Pleasant Grove Blvd in West Roseville. The new location is out of the floodplain and is designed to modern seismic standards.
- **NIMS National Incident Management System Training:** The National Incident Management System was adopted by ordinance.
- **Stage One Water Conservation Alert:** On April 30, 2008, the City of Roseville's Environmental Utilities Department activated a Stage One Water Conservation Level within the Roseville city limits in response to a letter received from the U.S. Bureau of Reclamation (USBR) which reduced Roseville's water supply for the 2008 calendar year by 25 percent.
- **Water Conservation Measures:** The Cash for Grass Rebate Pilot Program offered residents a chance to replace their turf with water conserving plants and landscaping. The rebate was \$1 for every square foot of turf replaced up to \$1,000 per customer. Every square foot of grass replaced with water-smart trees, shrubs and flowers saves an average of 55 gallons of water per year, so residents will also save money on their monthly water bill.

2007 Annual Multi-Hazard Mitigation Plan Review

- The City received the 2007 James Lee Witte Award for Excellence in Local Floodplain Management from the Association of State Floodplain Managers

-
- The City Council adopted three fire protection ordinances to protect life and property in the event of major structure fires. The adoption of a Fire Sprinkler Ordinance for Attached Housing, a High Rise Buildings Ordinance, and a Mid-Rise Buildings Ordinance in a single year represents a very proactive department and City Council with regards to reducing risk in Roseville.
 - A herd of goats ate an acre a day of dry grass, berry vines, and low-hanging tree branches along an open space area in one of Roseville's older neighborhoods providing an environmentally sensitive method of reducing fuels.
 - A Roseville staff member served as a League of California Cities representative on the State Hazard Mitigation Plan Update Committee.
 - Dozens of City staff completed the required National Incident Management Training (NIMS) training with advanced training scheduled for the future.

2006 Annual Multi-Hazard Mitigation Plan Review

- Review and prepare a report to Council that details progress on the action items in the Plan to better prepare the City in the event of a natural or human-caused disaster.
- Maintain compliance with the Community Rating System that requires an annual review for the City's CRS Recertification.
- Provide an opportunity for the public to provide input per the Disaster Mitigation Act, the federal legislation that mandates the Mitigation Plan.
- Request input from the Committee and the public as to what changes or enhancements should be made to the Plan and document these to be included in the 5-year Plan Update.
