Cover and divider art:

Throughout this Budget are select pieces of art representing some of the works of artists of the Health and Human Services Adult System of Care Welcome Center located in the Placer County Government Center. This program supports people on their individual paths of recovery. We would like to thank the artists for

allowing us to include their inspirational work in the Proposed Budget.

The Health and Human Services Department provides a broad spectrum of services throughout the Placer County community. Services are provided by assisting individuals and communities through direct services, contracts with partner agencies and coordination of resources in the community. This help

includes assistance with mental health issues.

One in four of us will experience mental distress or mental illness at some point in our lifetime. Mental distress affects people of all ages, in all kinds of jobs and at all educational levels. Mental health disorders are real, common and treatable. Living with and recovery from a mental disorder can be difficult but is

made possible by understanding and assistance from others.

The mission of the Welcome Center is to create a positive, supportive, safe environment for community members. The participants are provided the opportunity to grow in confidence and abilities, develop and utilize healthy relationships and discover abilities and talents. A variety of peer and

professional groups are offered, including art classes.
