

DUST CONTROL PLAN APPLICATION
PLACER COUNTY AIR POLLUTION CONTROL DISTRICT
 110 Maple Street, Auburn, CA 95603 • (530) 745-2330 • pcapcd@placer.ca.gov

| 1. CONTRACTOR AND OWNER INFORMATION | | | |
|-------------------------------------|-----|-------------------|-----|
| Contractor Information | | Owner Information | |
| Name | | Name | |
| Address | | Address | |
| City/State/Zip | | City/State/Zip | |
| Contact | | Contact | |
| Phone | Fax | Phone | Fax |
| E-mail Address | | E-mail Address | |

| 2.A. PROJECT DESCRIPTION | |
|---|---------------------------------|
| Assessor's Parcel Number (APN) | |
| Project Name | Project Number |
| Estimated Size of Project (total acres): | Disturbed Surface Area (acres): |
| Brief Description of Project Including List of Equipment to be used. (For example engines/portable engines rated greater than 50 horsepower, rock crushers, screens, trommels, concrete batch plants, etc.) If more space is needed, please continue in block 11 Comments on page 4. | |
| Start Date | Estimated Completion Date |

| 2.B. PROJECT LOCATION |
|---|
| Location (Attach sketch/map of work area on parcel, and list nearby cross streets or give detailed directions to project) |
| Address |
| City/State/Zip |

| 2.C. DECLARATION - PROJECT NOT IN A NOA AREA |
|---|
| <p>We declare that the area to be disturbed during this project;</p> <ul style="list-style-type: none"> <input type="checkbox"/> Is not located in a Geographic Ultramafic Rock Unit area "most likely" to contain NOA (naturally occurring asbestos) as indicated by the CGS (Department of Conservation, California Geologic Survey) 2006 map entitled, "RELATIVE LIKELIHOOD FOR THE PRESENCE OF NATURALLY OCCURRING ASBESTOS IN PLACER COUNTY, CALIFORNIA," and/or its derivative (vicinity) maps; or, <input type="checkbox"/> Does not have naturally occurring asbestos, serpentine, or ultramafic rock as determined by the owner/operator, registered geologist, or District Air Pollution Control Officer. <p>Note: If NOA, serpentine or ultramafic rock is discovered in the area to be disturbed after the start of any construction-related activity, an Asbestos Dust Mitigation Plan must be submitted to the District within 14 days of the discovery, and subparagraphs 5.A. through 5.E. of the ADMP Guidance must be implemented within 24 hours of the discovery.</p> |

PLACER COUNTY AIR POLLUTION CONTROL DISTRICT**

3. PROJECT TYPE

Activity: (At least one selection is required, please check all applicable selections.)

- | | |
|---|--|
| <input type="checkbox"/> Construction | <input type="checkbox"/> Commercial Property Development |
| <input type="checkbox"/> Grading | <input type="checkbox"/> Quarrying |
| <input type="checkbox"/> Road or Railway Construction | <input type="checkbox"/> Surface Mining |
| <input type="checkbox"/> Road Maintenance | <input type="checkbox"/> Trenching / Utilities Work |
| <input type="checkbox"/> Housing Development | <input type="checkbox"/> Other (please describe) |
- _____

4. TRACK-OUT PREVENTION

The following control measure MUST be addressed:

- Any visible track-out on a paved public road where vehicles enter and exit the work area must be removed at the end of the workday or at least one time per day. Removal shall be accomplished by using wet sweeping or a HEPA filter equipped vacuum device. (Rule 228 Sections 304.1 and 304.2)

Other control measures: (At least one selection is required.):

- A gravel pad designed using good engineering practices to clean the tires of exiting vehicles
- A tire shaker
- A wheel wash system
- Pavement extending for not less than fifty (50) consecutive feet from the intersection with the paved public road
- Any other measure(s) as effective as the measures listed above (please describe)

5A. VISIBLE EMISSIONS

Visible Emissions not Allowed Beyond Boundary Line:

- A person shall not cause or allow the emissions of fugitive dust from any active operation, open storage pile, or disturbed surface area (including disturbance as a result of the raising and/or keeping of animals or by vehicle use), such that the presence of such dust remains visible in the atmosphere beyond the boundary line of the emissions source. (Rule 228 Sections 301 and 401.4)
- When wind speeds are high enough to result in dust emissions crossing the boundary line, despite the application of dust control measures, grading and earthmoving operations shall be suspended and inactive disturbed surface areas shall be stabilized. (Rule 228 Section 401.6 and 402)

Visible Emissions from Active Operations:

- A person shall not cause or allow fugitive dust generated by active operations, an open storage pile, or a disturbed surface area, such that the fugitive dust is of such opacity as to obscure an observer's view to a degree equal to or greater than does smoke as dark or darker in shade as that designated as No. 2 on the Ringelmann Chart (or 40% opacity), as published by the United States Bureau of Mines. (District Rule 228 Sections 302 and 401.4)

**DUST CONTROL PLAN APPLICATION
PLACER COUNTY AIR POLLUTION CONTROL DISTRICT**

5B. VISIBLE EMISSIONS

Controls for Earthmoving Activities will include: (At least one selection is required.)

- Suspending grading operations when wind speeds are high enough to result in dust emissions crossing the property line, despite the application of dust mitigation measures (Rule 228 Section 401.6)
 - Application of water prior to any land clearing (Rule 228 Section 401.4)
 - Pre-wetting the ground to the depth of the anticipated cuts
 - Reduction in earthmoving equipment operational speed
 - Any other measure(s) as effective as the measures listed above (please describe)
-

Controls for Active Storage Piles will include: (At least one selection is required.)

- Keeping the surface adequately wetted
 - Covering with tarps
 - Treating with a chemical dust suppressant
 - Other (please describe)
-

6. TRAFFIC CONTROL FOR ON-SITE UNPAVED ROADS, PARKING LOTS AND STAGING AREAS

The following control measure shall be addressed:

- A maximum speed limit of 15 miles per hour (mph) unless the road surface and surrounding area is sufficiently stabilized to prevent vehicles and equipment traveling more than 15 mph from emitting dust exceeding Ringelmann 2 or visible emissions from crossing the project boundary line. (Rule 228 Section 401.2)
- If a local jurisdiction's Ordinance is more restrictive than the above control measure, then the Ordinance must be adhered to. Contact the local jurisdiction so that the more restrictive control measure is met.

Additional control measures: (At least one selection is required.)

- Water every two hours of active operation or sufficiently often to keep the area adequately wetted
 - Apply chemical dust suppressants consistent with manufacturer's directions
 - Apply covering (please describe)
 - Any other measure(s) as effective as the measures listed above (please describe)
-

7. OFF-SITE TRANSPORT

The owner/operator must ensure that no trucks are allowed to transport excavated material off-site unless (Rule 228 Sections 401.5 and 401.7):

- Vehicles leaving the site are cleaned to prevent dust, silt, mud and dirt from being released or tracked off site
- Trucks are maintained such that no spillage can occur from holes or other openings in cargo compartments
- Loads are adequately wetted

And either: (At least one selection required.)

- Covered with tarps
- Wetted and loaded such that the material does not touch the front, back or sides of the cargo compartment at any point less than six inches from the top and that no point of the load extends above the top of the cargo compartment

**DUST CONTROL PLAN APPLICATION
PLACER COUNTY AIR POLLUTION CONTROL DISTRICT**

8. MONITORING

Sampling (Rule 228 Sections 303 and 501):

- Sampling to determine compliance with the particulate concentration limit of Section 303 is required only when deemed necessary by the Air Pollution Control Officer and requested, with reasonable notice, of the person discharging emissions, or sampling may be conducted by the District with the costs of sampling borne by the person discharging emissions. Sampling must be carried out according to Section 501.

9. RECORDKEEPING

The owner/operator must ensure that the following District Rule 228 measures are observed:

- Any contractor engaged in any active operation subject to this rule shall maintain records of actions to stabilize surface areas sufficient to establish location, type, and date of treatment. Records shall be maintained and be readily accessible for two (2) years after the date of each entry and shall be provided to the District upon request and shall be open for inspection during unscheduled audits during normal business hours. (Rule 228 Section 503.1)
- Results of any air sampling or air monitoring conducted at the request of the Air Pollution Control Officer shall be maintained for at least two (2) years. (Rule 228 Section 503.2)

10. CONSTRUCTION EMISSIONS

The owner/operator must comply with the following if required as a Condition of Approval:

- A comprehensive equipment inventory list compliant with the pertinent Condition of Approval shall be submitted thirty days prior to ground-breaking, and
- The inventory list must be updated beginning thirty days after any initial work has begun, and must be in accordance with the applicable Conditions of Approval.
