	ntral Water Heating in Buildings with Multiple Dwellin	g Units (required for prescri	iptive)			
TO COMPLY - ALL BOXES MUST BE CHECKED						
브	All hot water piping in main circulating loop is insulated					
Central hot water systems serving six or fewer dwelling units which have (1) less than 25' of distribution outdoors; (2) zero distribution piping underground; (3) no recirculation pump; and (4) insulation on dispiping that meets the requirements of Section 150(j)						
	Central hot water systems serving more than 6 dwelling units - presence of either a time control or a time/temperature control					

## **DECLARATION STATEMENT**

- I certify under penalty of perjury, under the laws of the State of California, the information provided on this form is true and correct.
- I am eligible under Division 3 of the Business and Professions Code to accept responsibility for construction, or an authorized representative of the person responsible for construction (responsible person).
- I certify that the installed features, materials, components, or manufactured devices identified on this certificate (the installation)
  conforms to all applicable codes and regulations, and the installation is consistent with the plans and specifications approved by the
  enforcement agency.
- I reviewed a copy of the Certificate of Compliance (CF-1R) form approved by the enforcement agency that identifies the specific requirements for the installation. I certify that the requirements detailed on the CF-1R that apply to the installation have been met.
- I will ensure that a completed, signed copy of this Installation Certificate shall be posted, or made available with the building permit(s) issued for the building, and made available to the enforcement agency for all applicable inspections. I understand that a signed copy of this Installation Certificate is required to be included with the documentation the builder provides to the building owner at occupancy.
