RE: Amazing Facts Detention Pond Spillway Improvement Project, Rocklin

Hi Marcos,

Peak & Associates is assisting Amazing Facts, a Christian Media Ministry, with improvements to a water discharge channel located at the outlet of a small, man-made reservoir in property they own along Sierra College Boulevard (please see enclosed topographic map). A letter was sent the Tribal Preservation Committee on November 19, 2009 regarding this same project.

The proposed improvements to the discharge channel are located very close to a prehistoric period site. I met with the engineer on site and worked out a plan to ensure that the site in no way will be impacted by the proposed project. They have agreed to place protective orange fencing around the site to keep vehicles and equipment out, and to use a small bobcat type excavator to make improvements to the existing outlet channel. They have designed an access route and small staging area that is also away from any of the other four prehistoric period, and one historic period, cultural resources located within the overall 75 acre Amazing Facts property (please see second enclosed topographic map).

If you have any information about this area, or comments concerning this proposed project, please contact me (Neal Neuenschwander, Staff Archeologist), I can be reached at (530) 342-2800, by fax at (530) 342-0273, by mail at Peak & Associates, 3161 Godman Avenue, Chico, CA 95973, or by e-mail at peakinc@yahoo.com.

Sincerely,

Neal Neuenschwander
Staff Archeologist
