

**MEMORANDUM
DEPARTMENT OF FACILITY SERVICES
COUNTY OF PLACER**

To: **BOARD OF SUPERVISORS**

Date: **MARCH 10, 2009**

From: ~~J~~ **JAMES DURFEE / WILL DICKINSON** *WDM*

Subject: **2008/09 SEWER LINE VIDEO INSPECTION, PROJECT 40234**

ACTION REQUESTED/RECOMMENDATION: Staff recommends that your Board adopt the attached Resolution authorizing the Director of Facility Services to execute a contract with Coastline Water Resources for the 2008/09 Sewer Video Inspection – Project 40234, in an amount not to exceed \$119,527.30, upon review and approval by Risk Management and County Counsel, and approve any required change orders consistent with the County Purchasing Manual and Section 20142 of the Public Contract Code.

BACKGROUND: On January 27, 2009, your Board approved a list of prequalified firms to perform sewer line video inspections for sewer collection systems throughout the County. This list was established through a Request for Qualifications process administered by Procurement Services. On January 29, 2009, staff issued a letter to all four firms on the prequalified list to solicit cost proposals for sewer line video inspection work in Sewer Maintenance District (SMD) 1 and SMD 2 with the intention of entering into a contract with the responsive firm with the lowest cost proposal. Four cost proposals were returned and Coastline Water Resources provided the lowest cost for the work. The costs included in this contract range between \$1.10 and \$1.25 per foot depending on the size of the pipe. Costs for previous projects with similar pipe sizes have ranged between \$1.30 and \$1.81 per foot.

The project includes hydro cleaning and video inspection of approximately 75,000 linear feet of sanitary sewer lines within SMD 1 in the North Auburn area and 21,700 linear feet in SMD 2 in the Granite Bay area. The goal of the sewer line video inspection is to locate ground water infiltrating into the sewer collection system and to identify repair projects that will minimize this infiltration. The information is also used in Sanitary Sewer Management Plans required by the Regional Water Quality Control Board, and will be used to develop five and ten-year Capitol Improvement Programs.

This work will provide the most useful information if conducted during the winter months. In order to expedite completion of the project during the winter months, staff recommends that your Board authorize the Director of Facility Services to execute a contract with Coastline Water Resources and any required change orders.

ENVIRONMENTAL CLEARANCE: Cleaning and inspection of existing sanitary sewer collection lines is categorically exempt from environmental review pursuant to Section 15301(b) "Existing Facilities" of the California Environmental Quality Act Guidelines.

FISCAL IMPACT: The Engineer's Estimate for this work is \$119,527.30. Staff recommends a total project budget of \$138,000, which includes an approximate 15% contingency. Funding for this work is available in the FY 2008/09 Budget for SMD 1 (\$106,600) and SMD 2 (\$31,400).
